

Mohammad Bayat

Founder, Software Engineer, and Leadership Facilitator

me@OkBayat.com | www.okbayat.com | linkedin.com/in/okbayat

Professional Profile

Founder, software engineer, leadership facilitator, and coach with more than 16 years of programming experience and more than four years of professional coaching and consulting experience. Founder of [K2Quant](#), [Vocora](#), and [Photora](#), building businesses in quantitative technology, language learning, and AI-assisted product photography.

I currently work as a Leadership Facilitator at Gruccia. My work also includes approximately a decade of leadership-course involvement, group facilitation, learning-program design, and family-support work. Current independent inquiry examines reflective practice, durable learning, leadership, and what happens when people move from supportive learning environments into contexts that do not reinforce the same ways of thinking and acting.

Education

Bachelor of Science in Civil Engineering

Two-year programme following an associate degree

Associate Degree in Civil Engineering

Two-year programme

Selected Professional Experience

K2Quant - Founder and Software Engineer

May 2010 - Present

- Founded K2Quant and continue to develop quantitative and market-related software, with responsibility for architecture, development, testing, technical operations, and reliability.
- Support team coordination, communication, and shared decision-making.
- Website: K2Quant.com

Vocora - Founder and Software Engineer

July 2026 - Present

- Build Vocora, an English-learning and IELTS-preparation startup, developing its software and learning experience around structured lessons, language practice, and review.
- Website: vocora.ir

Photora - Founder and Software Engineer

September 2026 - Present

- Build Photora, an AI-assisted product-photography startup for turning ordinary product photos into polished advertising and social-media images.
- Lead product direction, software development, and the image-generation workflow.
- Website: photora.ir

Gruccia - Leadership Facilitator

July 2024 - Present

Work with the organization on leadership practice, employee well-being, team coordination, organizational communication, and sales strategy.

Radin Bourse - Full-Stack Developer

March 2020 - September 2025

Developed TypeScript and Angular applications and automated tests; collaborated with Java back-end developers on architecture, accessibility, and delivery quality.

Eghtesad Bidar Securities - Full-Stack Developer

October 2018 - March 2020

Built real-time market-data processing and technical-analysis charting for an online trading platform. Contributed to automated testing and delivery, and trained colleagues in object-oriented design.

Alibaba Travels Co. - Full-Stack Developer

May 2017 - October 2018

Developed a single-page booking back-office application and a Node.js template compiler to automate a manual workflow. Contributed to application design, debugging, and maintainability.

Tadbir Pardaz IT Group Ltd. - Developer

February 2016 - April 2018

Designed and maintained single-page interfaces for capital-market products, including implementation, user-interface design, and usability work.

Independent Software Project - Full-Stack Developer

April 2012 - May 2017

Built JavaScript libraries and tools for market visualization, interactive charting, SVG and Canvas drawing, and event-driven interfaces.

Leadership and Facilitation Experience

Independent Coaching and Consulting - Leadership, Life and Business Coach

Practice began April 2020 | Currently paused

- Provided professional coaching and consulting in individual, group, and organizational settings, working with individual contributors, managers, teams, and business leaders.
- Supported work on listening, feedback, responsibility, decision-making, relationships, and action, while maintaining client confidentiality.

Leadership Courses and Workshops - Facilitator and Programme Contributor

Approximately ten years of involvement | Course delivery currently paused

- Delivered and helped organize recurring leadership courses and workshops, both independently and as part of facilitation and organizing teams.
- Facilitated group dialogue, reflection, and practical exercises connecting course material with participants' own projects and everyday situations.

Mastery for Life - Programme Designer and Facilitator

Programme designed in 2024 | Delivery currently paused

- Designed and facilitated a recurring Persian-language group-learning programme exploring language, identity, worldview, responsibility, relationships, and reflection.
- Used group discussion and reflective activities to connect the programme's themes with participants' everyday lives.

Learning Circle - Project Designer and Facilitator

Started around 2023 | Educational project for children under 12

- Introduced programming through Code.org, combining independent progress, peer support, and peer teaching.
- Supported early group organization, then gradually stepped back from central teaching and coordination so children could take greater responsibility for their learning.
- Developed practice-based reflections on learning and group coordination after facilitator withdrawal; the project is not presented as a controlled research study.

FamilyLink - Community Support Initiative Lead

Approximately ten years of service | Currently paused

- Led sustained community support for children and families facing financial hardship, including children who had lost one or both parents.
- Coordinated financial and practical assistance, including children's clothing and household essentials, drawing on K2Quant resources.
- Helped caregivers access training and livelihood-related support.
